CSS COLOURS

CSS

Cascading Style Sheets (CSS) is a style sheet language used for describing the presentation of a document written in a markup language such as HTML or XML (including XML dialects such as SVG, MathML or XHTML). CSS is a cornerstone technology of the World Wide Web, alongside HTML and JavaScript.

Three ways to insert CSS

External CSS

Internal CSS

Inline CSS

- **External CSS**

  with an external stylesheet,you can change the look of an entire websiteby changing just one file! each HTML page must include reference to the external style sheeet file inside the element,insidethe head section.

- **Internal CSS**

  an internal style sheet may be used if one single htmlpage has a unique style the internal stylesheet defined inside the <.style.> elements,inside the head section.

- **Inline CSS**

  an inline syle may be used to apply a unique stylefor singleelement. To use inline styles,add the style attributes to the relevant element.the style attribute can contain any css property
